

# Sprint 2 Report

Slug Finance

2/15/23

## **Actions to Stop Doing:**

- The team should stop getting COVID
- The team should stop working in bursts, rather providing consistent work throughout the week, because we want to get more work done in the time we have left.
- The team should stop putting off work until prompted/confronted to do so because we would have a healthier working environment if everyone was accountable for the work they have to complete.

## **Actions to Start Doing:**

- The team should start learning how to graph and chart data in Javascript because that is an important part of our project
- The team should start communicating more often about the tasks they are working on in the project, so that there is a better understanding of what needs to be done and to encourage a better workflow between members

## **Actions to Keep Doing:**

- The team should continue to consistently attend Scrum meetings and keeping them under the time limit
- The team should continue to familiarize themselves with Tailwind CSS and React to work more efficiently
- The team should continue to add API calls so as to communicate the frontend with the backend
- The team should continue to create tables for new data that is required for different components of the project

**Work completed/not completed:**

- Completed
  - (20 Story pts) As an investor, I want to be able to have my own login to view my personalized portfolio so I can easily keep track of stocks that I am interested in
    - Login/sign up page layout complete
    - Automated yahoo login
    - User Accounts
    - Log in authentication through API
- Not Completed
  - (5 Story pts) As a data analyst, I want to be able to export data in a file with the click of a button
    - Storing historical data
    - Exporting to CSV
    - Scraping from yahoo portfolio

**Work Completion Rate:**

- 4 Tasks completed
- 15 Hours
- 14 Day Sprint
- ~1 Hour of Work Per Day/ ~2 Tasks Per Week
