

Sprint 4 Report

Slug Finance

3/13/23

Actions to Stop Doing:

- The team should stop developing defective code leading to technical debt.
- The team should stop putting off work until prompted/confronted to do so because we would have a healthier working environment if everyone was accountable for the work they have to complete.
- The team should stop going MIA since it unmotivates the team to do any work.

Actions to Start Doing:

- The team should start looking into deploying the web application
- The team should fix outstanding issues/bugs in code.

Actions to Keep Doing:

- The team should continue to consistently attend Scrum meetings and keeping them under the time limit
- The team should continue to write clean code and use test-driven development

Work completed/not completed:

Completed

- (20 Story Points) As a trader, I'd like to be able to login to my account and see all stocks I've added to my watchlist, to see their performance
- (15 Story Points) As a new trader, I'd like a description for each stock in order to educate myself on what this stock is and/or does
- (10) As a developer, I would like to have >88% code coverage, to make sure functions are being used.
- (8 Story Points) As an investor, I want to be able to import (and edit?) Yahoo portfolio from the app.
- (2 Story Points) As a trader, I want to be able to view my charts in various type of ways such as candlestick chart, or line chart.

Work Completion Rate:

- 5 tasks completed
- 50 hours
- 14 Day Sprint
- ~3.5 Hour of Work Per Day/ ~2.5 Tasks Per Week
